

FRANKE SPECIALIST RANGE

Innovative designs with style

SIMPLE STEPS TO YOUR PERFECT KITCHEN

From ultra-modern to traditional shaker style, we think that completing your perfect kitchen should be as easy as possible, so this brochure is designed to offer you all the information and inspiration you need to make a selection that complements the way you use your kitchen.

Your handy checklist to choosing your perfect Franke products:

Choosing a sink

- Measure the cabinet width of your kitchen
- Choose the material of sink
- Choose bowl configuration of sink
If choosing an inset sink, check on the sink profile options. If choosing an undermount sink, decide how you want the worksurface cutting to suit

Adding accessories and extras

- Choose from a range of complementary accessories
- Check which plumbing kit you need to buy to connect the sink to your waste system

Choosing a tap

- Choose from the full range of taps, including instant boiling water and filtered taps
- Check with your retailer/installer that your water pressure requirements will work with your chosen tap

Solutions for your ideal kitchen

- Explore our range of waste disposers
- Discover how a waste sorter could make your life easier

Simple pricing

All the prices in this brochure are inclusive of VAT, so the price you see is exactly the price you'll pay.

450 600 900

Cabinet width
The cabinet width measurement denotes the measurement which the sink bowl(s) need to fit into.

SINK STYLE OPTIONS

- Inset**
The frame of an inset sink sits on top of the worksurface. These sinks are compatible with any worksurface, including laminate worktops.
- Undermount**
An undermount sink is installed underneath the worktop, only compatible with solid surface worktops such as granite or solid wood.
- Belfast**
Belfast sinks are installed either 'dropped-on' to a purpose built cabinet or by using installation brackets.

INSET SINK PROFILES

Franke sinks come with a range of different profiles, detailed below, see page 8.

- Standard**
Edge is rolled over to meet the worktop.
- Swiss-edge**
Edge has a built-in water-protection seal.
- Slim-Top**
Edge sits flat on the surface of the worktop.

BOWL CONFIGURATION

Ensure you choose the correct sink configuration for your kitchen, see page 9.

- LHD, RHD and REV**
Indicates whether an inset sink is available with a Left Hand Drainer (LHD) or Right Hand Drainer (RHD). REV indicates an inset sink suitable for both left and right configurations.
- LHSB and RHSB**
Denotes whether an undermount sink is available as Left Hand Small Bowl (LHSB) and/or Right Hand Small Bowl (RHSB).

SINK EXTRAS

- Waste Disposal Unit compatibility**
See page 11 for more details.
- Sink features a patented Hygienic Overflow**
See page 12 for more details.
- Plumbing Set Connector included**
Some Fraganite 1.5 bowl sinks contain a plumbing set connector linking the 2 bowls.
- Plumbing Kit Compatibility**
 - Siphon 1**
Compatible with a single bowl sink.
 - Siphon 2**
Compatible with 1 1/2 bowl and 2 bowl sinks.

WATER PRESSURE

- Suitable for Low Pressure Systems**
Indicates this tap will work with a low pressure system, delivering at least 4 litres per minute of hot water at 0.3 bar pressure.

TAP FEATURES

- Perlator**
Mixes air into the flow of water to give a champagne like flow.
- Filtered Water**
Dispenses filtered water.
- Instant Boiling Water**
Dispenses 100°C boiling water, see page 44.
- Pull-Out Spray**
Feature a pull-out spray, useful for directional rinsing.
- Pull-Out Nozzle**
Feature a pull-out nozzle, useful for directional rinsing.
- Directional Nozzle**
The end of the tap can be manipulated in any direction.
- LED Lighting**
Spout houses LED lighting providing ambient lighting.
- Hand Spray**
Hand spray mounted into the worktop providing mixed water.
- Side Spray**
Side spray mounted into worktop providing cold water.
- Colour Levers available**
Colour coordinated levers to complement the sink colour.

GUARANTEES

- Sinks**
50 Years.
- Waste Disposal Unit**
Lifetime Warranty.
- Waste Disposal Unit**
10 Years Warranty.
- Waste Disposal Unit**
8 Years Warranty.
- Taps**
5 Years moving parts and 5 years coatings and finishes.
- Taps**
5 years moving parts and 1 year coatings and finishes.

CONTENTS

A guide to your Franke brochure 4-13
An easy to use guide designed to walk you through the process of choosing your perfect Franke sink, highlighting the factors and options you should consider.

Specialist Range sinks 14-43
Our finest collection of sinks, presented in an easy to understand format with complementary tap suggestions – although the choice is completely yours. Every Franke sink is backed by a 50-year guarantee for your peace of mind.

Our aim to bring Franke excellence to every aspect of the kitchen continues with a full range of solutions to complete your kitchen, including waste disposers and sorters.

Specifications

62-73

Full technical details of all Franke products are listed for an at-a-glance reference guide for checking sizes, making comparisons and other finer details.

Welcome to the 2013 Specialist Range of sinks and taps

These days the kitchen is the very heart of the home, a place to express yourself, not only in what you create in the kitchen, but in how you create the kitchen itself. It's a hub, where friends and loved ones gather and it should reflect a very personal style. In turn, your kitchen should inspire you.

At the very centre of any kitchen is its sink and tap. No other items better encapsulate the kitchen's balance of form and function, and Franke is uniquely placed to support your lifestyle choices through a diverse range of styles to suit any personality.

Be inspired

Our range is constantly evolving and this brochure simply represents a point in time, offering a snapshot of our offering. Our website, Facebook and Twitter pages are regularly updated with ideas, inspiration and innovations to bring kitchen dreams to life.

www.franke.ie

facebook.com/FrankeUK

twitter.com/FrankeUK

FRANKE

Founded in 1911, Franke was built on a foundation of precision engineering, combined with traditional craftsmanship. Over 100 years later, those principles endure, while a focus on the changing needs and lifestyles of our customers has helped us become the world's largest manufacturer of kitchen sinks.

SWISS PRECISION ENGINEERING

Many things have changed in the past century, but what is always the same is a set of values, characterised by respect, trust and openness. The values of innovation, entrepreneurship, quality and stylish design were in the heart of Hermann Franke and continue to be at the heart of the business, as we enter a second century of smart design and stunning beauty.

A century without compromise

The Franke story began as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke in 1911. Since then, we've established efficient and economic manufacturing facilities all around the world.

Innovation is in our DNA

We continue to be passionate innovators and our aim is to constantly improve the look and usability of our designs. Staying at the forefront of the industry is vitally important to us, so we have continually enhanced manufacturing techniques and made pioneering use of new materials to ensure that exciting new design possibilities continue to open up. This means our range is always evolving to include the very highest levels of form and function.

Peace of mind with Franke quality

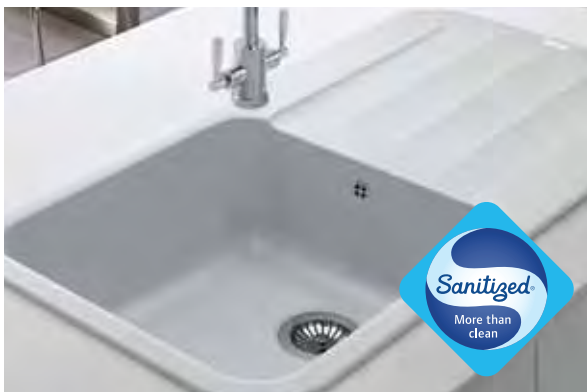

Franke products are built to last. From our commitment to using only the finest quality materials, to the state-of-the-art manufacturing techniques, we have absolute confidence in every product in our range. That's why we're proud to offer a 50-year guarantee against manufacturing defects on our sinks and varying levels of guarantee for other products. Full details can be found on the pull-out flap on the inside cover of this brochure.

50Year 
Guarantee

MATERIAL AND FINISH OPTIONS

Different kitchens place different demands on your sink, so our precision-engineered materials each have individual character and unique benefits. They cover everything from the latest trends to traditional favourites, so all you have to do is pick the one that best fits your lifestyle and your personal choice.

Fragranite treated with Sanitized®

Fragranite is an exceptionally tough material which is highly resistant to burns, dents chips and stains. It was pioneered by Franke and contains 80% granite to form a unique material with a subtle sheen that is warm to the touch.

Kitchens can be a critical location for spreading bacteria and demand special attention to hygiene. On unprotected material, bacteria can multiply every 20 minutes making surfaces unhygienic. The integrated Sanitized® hygiene function in Fragranite sinks helps to keep this area clean and provides the sink with lasting protection. It does not replace normal cleaning but helps to keep surfaces free from bacteria. Tests have proven that Fragranite treated with Sanitized® reduces bacteria and microbe growth by 99%.

Stainless Steel

Franke stainless steel sinks are made from premium quality chrome nickel steel, which looks stunningly beautiful, is highly resistant to staining, rust and corrosion - plus it won't chip, craze, flake or break. It's the most popular material - and for good reason: Stainless steel has a timeless quality that sits beautifully in a traditional or contemporary style kitchen, offering stunning good looks and a durability that helps keep it looking at its best for years.

Franke offer sinks in a selection of stainless steel finishes, so whether you prefer the more reflective qualities of the polished finish or the more subtle look of the silk or brushed finishes, which give a more matt sheen, there is a stainless steel solution for you.

Silk Brushed Polished

Ceramic

Ceramic sinks have been a popular choice for years and combine well with a variety of work surfaces such as wood, glass and granite. Ceramic sinks have a smooth, impervious surface, which is resistant to all standard household chemicals. It's a very hardwearing choice that stands up to heat, staining and impacts with ease.

White Black

Glass

Franke uses a combination of toughened safety glass and stainless steel bowls to cope with even the most demanding hard wearing environment. Perfect for that modern, aesthetic statement in the kitchen.

White Aqua Black

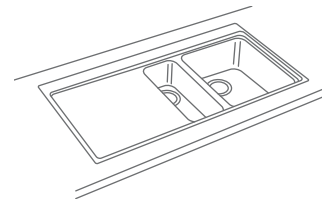

CHOOSING YOUR SINK

There are a number of considerations to take into account when choosing a sink. Not only should it accentuate the overall look and feel of your kitchen, but also there are installation and functionality options to take into account. Another vital element to consider is the way your sink physically fits into the heart of your kitchen.

Inset

This classic method of installation involves your sink being installed from above into a pre-prepared hole in your worktop. It gives you the widest range of sink shapes, sizes and styles to choose from, so you can be sure that there is an inset sink to suit your kitchen.

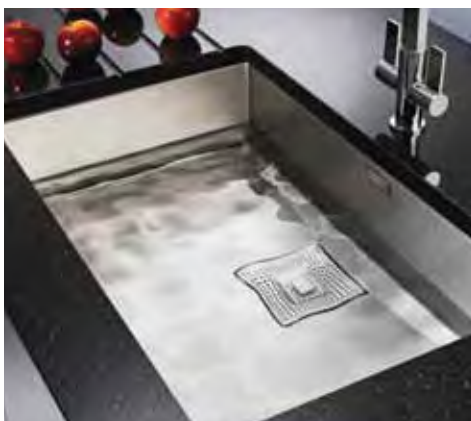

Standard
rolled Profile

Swiss-edge
Profile

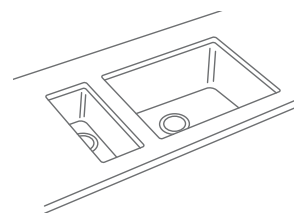

Slim-Top
Profile

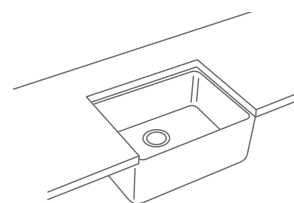

Undermount

Particularly pleasing when combined with granite, wood or solid surface worktops, undermount sinks allow for smooth, uninterrupted surfaces. Fitted underneath the work surface, it gives an edgeless finish that is easy to clean and is perfectly integrated into the kitchen environment.

Belfast

The quintessential choice for a stylish, hardworking kitchen, it's no wonder that the Belfast sink is enjoying a renaissance. They are easy to clean, resistant to stains, provide a large washing bowl area and are an ecologically friendly choice. Used either as a freestanding feature with brackets or set on top of base units, the Belfast is as charming and practical today as it's always been.

We have more detailed information on sink styles and installation advice for you at franke.ie

BOWL AND DRAINER CONFIGURATION

After deciding on the style and material of your preferred sink, you should also take into consideration the cabinet width, along with your preferred bowl and drainer configuration.

Bowl Configuration

One core consideration is the format of the bowls. Whether you prefer the larger area of the single bowl or the versatility offered by the 1 & 1/2 bowl format, there are options to suit. See diagrams for more detailed information.

Cabinet size

Whatever the configuration, it is essential to check the cabinet size of your kitchen to ensure the sink will fit. Your sink bowl(s) is required to fit inside a single cabinet, so the cabinet size of each sink is indicated via a symbol, corresponding to the key found on the inside flap of this brochure.

Drainer Configuration

Once you have settled on a location for your sink, you can select from a number of drainer options for many styles. They include:

LHD or RHD – This describes whether the drainer on the sink is found to the left or to the right of the main bowl.

REV – These reversible designs have a tap hole at the front and back, giving you the freedom to position the sink to provide either a left or right handed drainer.

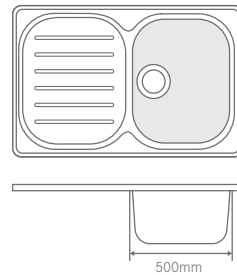

LHSB & RHSB – For sinks without a drainer but with more than one bowl, this indicates which side the small bowl is positioned.

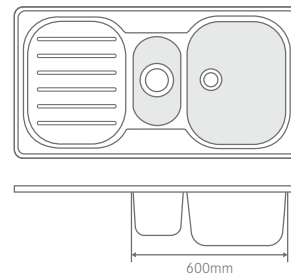

Exploring the full range

This brochure demonstrates the huge breadth of styles available in the Franke sink range, but in some ranges, there are several configurations to choose from in the same style. When this applies, you will find this symbol, which indicates the number of extra configurations available and will direct you to the sink specification section. This section provides comprehensive and detailed information on all sinks in the entire range, including all the different configurations for each particular style.

TAPS WORTH TALKING ABOUT

The ever-evolving Franke tap range provides you with endless shape, line and contour possibilities and provides your kitchen with a focal point – and in some cases, a talking point.

Boiling water taps

The Minerva range provides instant boiling water at the touch of a button, turning the humble kitchen tap into the ultimate timesaving, space-saving device.

Filtered water taps

Our FilterFlow taps deliver hot, cold and filtered water in high style. There's no need to buy bottled water, and you can even do your bit for the environment.

Mixer taps

Our range spans the entire spectrum of design, from traditional bridge taps to the chic practicality of a chef's style tap. Many have features to simplify meal preparation and kitchen tasks, while taps with special features can really set your kitchen apart from the rest and completely revolutionise the way you use your kitchen.

Tap considerations

With a variety of style, size and finish options to choose from, you'll be spoilt for choice, though don't forget that the water pressure in your home will affect your decision. A plumber or retailer should be able to help you discover which pressure system you have so you can find the right tap for your needs.

KITCHEN SOLUTIONS

Everything in the kitchen should flow smoothly, not just the tap. That's why we created products to make your life easier in the kitchen and that help to maintain a tidy working environment. The inset waste bin sits neatly in the countertop so food waste can be quickly and hygienically disposed of, while maintaining a minimalist look, and the Franke waste sorter range has multiple solutions to aid in the environmentally friendly disposal of waste.

Inset Waste Bin

Sorter 350-60

WASTE DISPOSAL UNITS

A choice of four units designed to free the kitchen of unsightly and unhygienic organic household waste. Each unit is the essential add-on for ensuring that all Franke appliances and work surfaces remain looking immaculate.

Thanks to a unique, permanent magnet motor, Franke Turbo Plus Waste Disposal Units reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system. For prices and full specifications see page 61.

PLUMBING KITS

Franke Plumbing kits are designed to assist in optimising the underside of the cabinet space and in many cases provide for better utilisation of under-sink storage. Franke Siphon plumbing kits are made of rigid grey polypropylene and are the hygienic solution to a Franke sink waste system. Siphon plumbing kits have a manifold with an incline and an air vent for faster water disposal. The relevant plumbing kit is shown with each sink throughout the brochure.

Siphon 1 Plumbing Kit

Siphon 2 Plumbing Kit

Waste and Overflow Solutions

All Franke Basket Strainer Wastes are manufactured from stainless steel. A stainless steel bearing is located on the stem which is designed to stop the water flow, and when left in position without sealing will act as a sieve for foodstuffs.

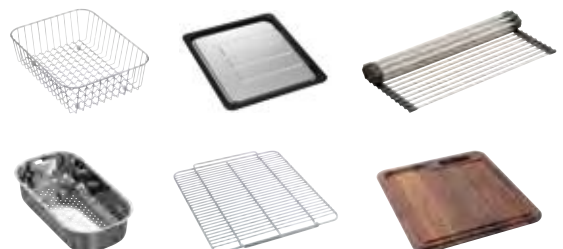

Some Franke sinks come with a Hygienic Overflow, which offers versatility for cleaning. Simple removal of the logo plate reveals the overflow aperture for easy, hygienic cleaning.

ACCESSORIES AND EXTRAS

Franke accessories are specially designed to help you get the most out of your sink. We realise that many people use their sink in different ways, so these products correspond to common kitchen activities and turn your Franke sink into the ultimate multi-purpose workstation. The handy Rollamat is ideal as a drainer or for safely placing hot pans on any surface and our Mobile Drainer provides both a cover and a drainer for your sink.

Other items aid in food preparation and dish washing and all accessories have been created to complement the outstanding beauty of your Franke sink.

To see the full range of accessories available for each sink visit franke.ie

COMPLETE YOUR KITCHEN DREAM WITH EASE

A sink to suit your style

To help you navigate the wide range of aesthetic, installation and functionality considerations surrounding your choice of sink, you'll have detailed information at your fingertips. Each option is explained fully over the following pages, but the handy pull-out flap gives you an at-a-glance reference guide to all the information.

Adding your perfect tap

Franke taps combine outstanding performance and stunning design to suit your taste – whatever it may be. You'll be able to quickly discover the innovative features that each tap possesses; features that are sure to get your kitchen noticed.

Our taps are designed to fit a standard 35mm tap hole (except where indicated), giving you the freedom of the entire range to find your sink's ideal partner. It is important to identify whether your home has a high or low water pressure system, as it will affect your choice of tap – your installer or kitchen retailer should be able to help.

Accessories & extras

We also have a number of stylish and innovative products that are specifically designed to enhance the aesthetic and functionality of your sink, streamlining kitchen tasks to preserve its look and longevity.

Full kitchen solutions

A working kitchen doesn't have to be a cluttered kitchen. Our range of clever storage and waste products help to maintain a clean and clear space for those with even the busiest lifestyles.

TIME IS PRECIOUS, MAKE THE MOST OF IT

The Minerva boiling water tap from Franke turns the humble kitchen tap into the ultimate timesaving, space-saving device. Featuring cutting-edge technology, and the very best in modern design, the Minerva delivers instant hot, cold and boiling water in a single tap to ensure it can be installed in new and existing kitchens.

Multiple patents make the Minerva a unique, convenient and safe device. Both the spout and operating handle stay cool, while a two-step safety handle provides ease of use with security as standard. The Minerva is the best-selling boiling water tap on the market and more and more people are discovering that it's the one kitchen item they simply can't do without.

100°C water. No waiting

The Minerva system utilises a space-saving water tank that fits discreetly into your kitchen so that boiling water is always ready when you need it. Unlike a kettle, it only uses what is required and has a silent heating operation.

Form and function combined

Boiling water at your fingertips

See the Minerva boiling water tap in action at franke.ie/minerva

THE MINERVA SYSTEM

Featuring 4 different models, the Minerva boiling water system is safe, convenient and easy to maintain. Like the rest of the Franke range, there are multiple options and configurations at your disposal to fit in with your needs and your lifestyle.

A range of models to choose from

Not only does the Minerva system offer conventionally manufactured taps, but for the really discerning customer, Franke now offers the Minerva Helix and Mondial models, which are crafted from solid stainless steel to complement your sink and provide an unparalleled finish.

Safety as standard

All Minerva 3-in-1 taps incorporate a 2-step safety control to avoid accidental activation. The handle is also spring-loaded so the flow of boiling water is instantaneously cut off upon release of the handle. The boiling water and mixed water are provided through completely separate channels inside the tap, ensuring the normal hot/cold function is never mixed with boiling water.

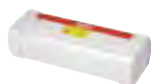

5 Litre Horizontal Heating Tank

Discreet and suitable for almost any kitchen, the horizontal water heating tank sits neatly under the standard 150mm cabinet plinth, freeing up much-needed cupboard space. This tank is supplied with all Minerva taps.

See the Minerva boiling water tap in action at [franke.ie/minerva](https://www.franke.ie/minerva)

FRANKE FILTERFLOW RANGE

The Franke FilterFlow range delivers water in separate channels – dispensing hot, cold, mixed or filtered. Combining the considered beauty of our most stylish designs and the technologically advanced ceramic water filtration system of the Franke FilterFlow family, the products in the Franke Specialist range are the perfect addition to any modern kitchen.

These desirable taps are a stunning complement to many of the Franke sinks in the range, creating a coordinated look with effortless style. Franke FilterFlow taps deliver hot, cold and filtered water using an advanced ceramic cartridge. This water filtration system is protected by a robust stainless steel housing on all Franke FilterFlow taps where indicated, adding reassuring durability to elegant aesthetics. Or why not consider the contemporary stand-alone Franke FilterFlow Mini model, which dispenses filtered water.

Stainless Steel housing with bayonet fitting

FRANKE FILTERFLOW HAND SPRAY RANGE

All the superb benefits of Franke FilterFlow with the added feature of a separate pull-out Hand Spray, the Franke FilterFlow Hand Spray system is for kitchens that demand that little bit more.

The precision engineered taps in this range boast the full complement of features that are present in the Franke FilterFlow range - including its advanced wout Hand Spray which is usually fitted into a solid surface worktop.

The standard length of hose for the hand spray is 1 metre, however the amount that the hose will pull out is determined by the position of the hand spray in the worktop.

The ideal hygienic kitchen solution, the spray is perfect for rinsing food as part of meal preparation and dispenses hot, cold or mixed water from the main supply. Each spray is also specifically designed to reflect the aesthetic of the particular tap that it accompanies.

For more comprehensive information visit the FilterFlow section of our website at [franke.ie/filterflow](https://www.franke.ie/filterflow)

Franke Pro-Value Range Brochure

A wealth of Franke expertise and information is available to you via our suite of brochures. They will inform and inspire you – request yours today. All brochures are downloadable from www.franke.ie or phone the consumer brochure line 01 413 6416 to get your copy now.

Pro-Value Range Brochure

Providing classic Franke quality at affordable prices. No corners cut, just fantastic Franke products at a reasonable price.

Colours shown are for reference only. All sinks available with left or right hand drainer. The description 'reversible' means that the design enables the same sink to be turned to drainer on the left or drainer on the right. In the case of a 'handed' sink it is necessary to specify which side the drainer is required e.g. ARX 654 left hand drainer or ARX 654 right hand drainer. All bowls sizes and dimensions are described in mm.

Franke sinks are guaranteed against manufacturing defect for 50 years. Franke taps are guaranteed against defective materials and workmanship for 1 year in relation to coatings and finishes (5 years for Portfolio 55 Collection), and 5 years in relation to moving parts. Franke will replace (and where appropriate repair) defective sinks. In relation to taps, Franke will, where appropriate, provide replacement parts for your taps or replace your taps at their discretion. Any associated or ancillary costs to be incurred by you as a result of replacement of Franke sinks and taps under this guarantee shall in all cases be previously approved by Franke UK Limited. This guarantee is in addition to and does not affect your statutory rights.

Prices shown are Republic of Ireland prices effective from 1st March 2013 and include VAT at the current rate of 23%. This literature has been produced on chlorine free materials harvested from sustainable forests. The Franke policy is one of continual improvement and Franke reserves the right to alter models and specifications without notice. E & OE.

Member of REPIC for WEEE Regulations. EEE Producer Registration Number - WEE/DG0059TT.

Front cover shows **Sinos SNX 251** and **Sinos Chrome tap**.
